

KTHouse

Real Estate Tokenization System

Issues about Real Estate Investments

- They are not within everyone's reach
- It takes a lot of capital
- They are not **LIQUID**
- Need for competence (*to make the right choice*) = High Risk
- Geographical Limits (*"usually you invest near home"*)

How to find the right investment?

KTHouse = Real Estate Projects

- Selection and Buying of Real Estate Assets (Lot, Building)
- Technical projects development (engineering, architectural, etc.)
- Financial plan development
- Building Construction
- Sale of the Buildings
- Real Estate Tokenization Management (Stellar blockchain)

Why Tokenization?

- Fix **LIQUID** issues
- No more needing of Big Capital
- Low transaction FEE
- You can diversify by investing in many initiatives = Low Risk
- No more Geographical Boundaries

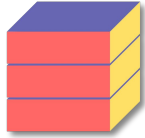

Greater investment opportunities

- Low Transaction FEE
- Multi ASSET Support
- TRUSTLINE Concept
- Well Known
- Reliable Network
- Growing Community

Utility Token

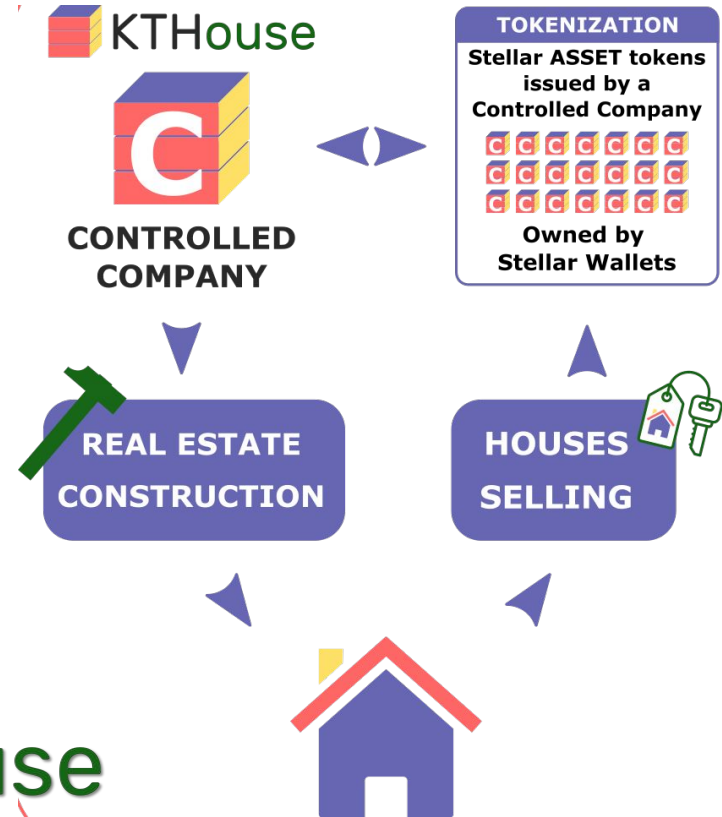

KTHOUSE

- Staking (coming soon)
- Weekly Yield = Fidelity Distribution
- Future Interaction with Projects
- Future Developments
